☎ 240-338-4496

Employment History

- 2016 – **Graduate Student Researcher**, Georgia Institute of Technology, School of Physics, Center for Non-linear Science.
- 2014 – 2016 **Tutor**, Vanderbilt Physics Department.
- 2015 Summer **Undergraduate Research Assistant**, National Science Foundation International Research Experiences for Students, McGill University.
- 2014 Summer **Undergraduate Research Assistant**, United States Naval Observatory.

Education

- 2016 – 2021 **Georgia Institute of Technology** School of Physics.
Thesis title: Investigation of spatiotemporal chaos using persistent homology
Doctor of Philosophy-Physics, President's Fellow
- 2012 – 2016 **Vanderbilt University**
Bachelor of Arts-Physics with Highest Honors
Thesis title: *Ps₂- in a magnetic field : structure and stability in the M=0 state.*
Bachelor of Arts-Mathematics

Research Publications

Publications

- 1 **Tregoning, B.**, Mukherjee, S., Suri, B., Mischaikow, K., Paul, M. R., & Schatz, M. F. (2021). Quantifying plume statistics in spatiotemporally chaotic Rayleigh-Bénard convection using persistent homology (in preparation).
- 2 **Tregoning, B.**, & Stewart, S. G. (2014). Predicting navigational error of visual binary stars. *Naval Engineering Journal*, 126.4, 169–172.

Research Experience

Schatz Lab, Georgia Institute of Technology, School of Physics, Center for Non-linear Science

Advisors: Michael Schatz and Roman Grigoriev, 2016 –

- Uses topological data analysis to study spatio-temporally chaotic fluid flows.
- Predicts the evolution of dynamical systems using machine learning.
- Detects exact coherent structures in dynamical systems using persistent homology.

Varga Group, Vanderbilt University, Physics Department

Advisor: Kalman Varga, 2015

- Studied quantum few-body problems.
- Calculated stability of positron-electron systems using a variational method.

United States Naval Observatory

Advisor: Susan G. Stewart, 2014

- Studied navigational astronomy.
- Quantified visual navigational error of binary star systems.
- Studied weather effects on sky visibility.

Bolotin Group, Vanderbilt University, Physics Department

Advisor: Kirill Bolotin, 2013 – 2014

- Studied experimental condensed matter physics.
- Gained experience exfoliating graphene.
- Gained clean-room training and experience.

Skills

Languages	English (fluent), Spanish (comprehension)
Coding	Python, MATLAB, Latex, R, C, C++, SQL
Scientific	Statistical Methods, Machine Learning, Numerical optimization, Network Science, Data Science, Numerical Methods, Fluid Mechanics, Dynamical Systems, Topological Data Analysis
Misc.	Teaching, tutoring, academic research, academic mentoring

Leadership Experience

- 2020 –  **Diversity, Equity, and Inclusion Task Force**, Georgia Tech School of Physics
- 2015 – 2016  **Music Director**, WRVU Vanderbilt College Radio
- 2014 – 2016  **President**, Vanderbilt Quiz Bowl
- 2013 – 2015  **Secretary**, Vanderbilt Society of Physics Students

Awards and Honors

- 2016  **President's Fellow**, Georgia Institute of Technology.
-  **Highest Honors**, Vanderbilt University Physics Department.
- 2012, 2014, 2016  **Dean's List**, Vanderbilt University.
- 2014  **Sigma Pi Sigma Physics Honor Society**, Vanderbilt University Physics Department.
